MMM. Protecting human health.

Safe – flexible – ergonomic

The MMM rack and accessories range for glassware and other materials in the laboratory area were developed in close co–operation with users. This practicality is readily apparent. The result is a broad range of loading racks with suitable insert modules for cleaning a wide variety of glassware, such as conical flasks, beakers, bottles and measuring cylinders as well as other materials in the laboratory area.

The MMM racks will impress with their:

- Outstanding cleaning and drying performance
- User-friendly loading thanks to the modular rack design for flexible and application-specific loading configurations.
- Ergonomic and safe handling of loads
- Stable, stainless steel construction
- Loading racks can be rotated in both directions (also by 180°) during loading
- CoolTouch handles

Note: All products referred to in this brochure are suitable for use in both Uniclean® PL II 15 and Uniclean® PL II 30 type machines.

Further accessories such as two-tier rack rest systems or the height-adjustable transport trolley simplify rack logistics and ergonomics in laboratory facilities.
